

LEVEL 2 TASK GUIDELINES

Learn • Lead • Inspire

Official Task Document

Campus Mantri Program

Didn't Qualify for Level 1? No Worries!

Not qualifying for Level 1 doesn't define your journey.

Every successful journey is built on consistency, not on a single result.

Sometimes we don't achieve what we expect on our first attempt, but that doesn't mean the opportunity is over.

Every new level brings a new chance to prove yourself.

Remember, this program still has two exciting stages ahead.

- Level 2 is now live.
- Level 3 is still waiting for you.
- Exciting rewards for Level 2 will be revealed very soon.

Don't focus on what you missed.

Focus on what you can achieve next.

The students who stay consistent, keep learning, and continue putting in their efforts are the ones who create the biggest impact.

Your journey is far from over.

This is your chance to make an even stronger comeback.

Keep learning. Keep growing. Keep leading.

Campus Mantri is More Than Just Rewards

Many students believe this program is only about winning Rewards.

It isn't.

We want something much bigger.

We want you to become known throughout your college.

We want juniors, seniors and faculty members to recognize your efforts.

We want people to proudly say...

"Hey CM! Come here."

That identity is much more valuable than any reward.

This experience adds value to your resume.

Companies appreciate students who can lead communities, influence people, organize campaigns, and create impact.

That is exactly what this program is designed for.

We don't just build Campus Mantris.

We build future leaders.

Level 2 Overview

Level 2 follows the same structure as Level 1.

However, this time there are fixed milestones.

You must achieve specific registration targets using your personal UTM link.

Performance will be evaluated based on successful registrations.

Higher milestones unlock better rewards.

GeeksforGeeks × MongoDB Collaboration

MongoDB and GeeksforGeeks have collaborated to help students strengthen one of the most important skills in software development.

As technology students, everyone understands the importance of data.

Every application stores data.

Instagram.

WhatsApp.

Netflix.

Amazon.

Swiggy.

Everything works because of databases.

MongoDB is one of the world's leading NoSQL databases used in startups and large technology companies.

This collaboration allows students to learn MongoDB absolutely free.

Students will learn

- MongoDB Fundamentals
- NoSQL Concepts
- Backend Development
- Real World Projects
- Industry Use Cases
- Skill Badges
- Certificates (where applicable)

Your Responsibility as a Campus Mantri

Many of you have already explored the MongoDB course.

Now your responsibility is to spread awareness.

Don't simply send your UTM link.

Explain why learning MongoDB matters.

Create curiosity.

Relate it to real-world applications.

Instead of saying

"Please register using my link."

Try explaining

Every application you use stores millions of records every day.

MongoDB is one of the most demanded NoSQL databases in the software industry.

Learning it today can strengthen your backend, full-stack and data engineering journey.

When students understand the value,

registrations happen naturally.

Registration Criteria

A registration will only be counted when

- User registers using your unique UTM link
- User explores the MongoDB course
- Completion and certificate are also recommended

Only then will it count as

1 Successful Registration

Simple clicks will not be counted.

Important Evaluation Criteria

For Level 2, there will be **no normalized points** for reward evaluation.

Your performance will be assessed based on your **actual achievements** throughout the program.

This includes:

- Successful registrations generated through your unique UTM link.
- Dashboard tasks completed before their respective deadlines.
- Points earned from valid and approved task submissions.

Every registration and every completed task will directly contribute to your overall performance. Therefore, focus on both driving registrations and consistently completing your dashboard tasks.

Welcome Kit Eligibility

Students who achieve

200+ Unique Successful Registrations

through their personal UTM link will be eligible to receive the

Official GeeksforGeeks Welcome Kit

Note: This Welcome Kit is only for Campus Mantris who have **not received it previously**. If you have already been awarded the GeeksforGeeks Welcome Kit in an earlier

program or level, you will **not be eligible** to receive it again. This opportunity is intended to recognize and reward new achievers.

Special Rewards

Students who achieve

5000+ Successful Registrations

through their UTM link

will become eligible for

Special Rewards

More exciting reward details will be announced soon.

Competition is Tough

This time the competition will be stronger than before.

Students who start early,

build awareness,

and consistently promote the opportunity

will naturally perform better.

Remember

People don't register because someone shares a link.

People register because someone explains why it matters.

UTM Link and Dashboard

Every Campus Mantri will receive

- Personal UTM Link
- Updated Dashboard

through email.

Keep checking your inbox regularly.

Task Timeline

Task Duration

21 July 2026 – 20 August 2026

Final Submission Deadline: 20 August 2026

Please note that **20 August 2026** is the final deadline, and no extension will be provided under any circumstances.

You have a full month to achieve your milestones, so start promoting early and stay consistent throughout the campaign.

UTM sheet Update Schedule

The UTM Sheet will be updated every **7 days**.

- First Update: **28 July 2026**
- Second Update: **4 August 2026**
- Third Update: **11 August 2026**
- Fourth Update: **18 August 2026**
- Final Count: **20 August 2026**

The update process will remain the same as in the previous task. Please wait for the scheduled dashboard updates, as successful registrations will only be reflected during these update cycles.

Final Message

Every registration is more than just a number.

You are helping someone learn.

Helping someone grow.

Helping someone take one step closer to their dream career.

Lead with purpose.

Create impact.

Grow your community.

And let your college proudly say

”Hey CM!”

All the Best for Level 2!
