

Campus Mantri Task 7 – Build AI Agents with Snowflake Cortex AI Awareness Campaign

Task Overview

Task Name: Build AI Agents with Snowflake Cortex AI Awareness Campaign

Points: 500

Status:  Approved

Completion Date: 14 July 2026

Objective

The objective of this campaign was to spread awareness about the **Build AI Agents with Snowflake Cortex AI** program by promoting the official registration link through LinkedIn. As a GeeksforGeeks Campus Mantri, my responsibility was to introduce students and aspiring developers to the program, encourage registrations using my assigned UTM link, and help increase participation in this free AI learning initiative.

About the Snowflake Cortex AI Program

Snowflake Cortex AI is a suite of built-in Artificial Intelligence capabilities available within the Snowflake AI Data Cloud. It enables developers and organizations to build intelligent, data-driven applications using Large Language Models (LLMs) without requiring complex machine learning infrastructure.

The **Build AI Agents with Snowflake Cortex AI** program introduces participants to modern AI development by demonstrating how AI agents can interact with enterprise data securely and efficiently. The learning initiative focuses on practical implementation of generative AI technologies while leveraging Snowflake's scalable cloud platform.

The program generally covers:

- Introduction to Generative AI
- AI Agents and Agentic Workflows
- Snowflake Cortex AI Services
- Large Language Models (LLMs)
- Retrieval-Augmented Generation (RAG)
- Prompt Engineering Fundamentals
- Vector Search Concepts
- AI-Powered Enterprise Applications

- Secure AI Development on the Snowflake AI Data Cloud
-

My Contribution

As part of this campaign, I:

- Explored the official Snowflake Cortex AI learning program.
 - Understood the objectives and learning opportunities offered by the initiative.
 - Promoted my assigned UTM registration link through LinkedIn.
 - Shared the official promotional graphic provided for the campaign.
 - Encouraged classmates, peers, and professional connections to register for the free program.
 - Created awareness about AI Agents, Generative AI, and Snowflake Cortex AI within my network.
 - Successfully submitted proof of completion through the Campus Mantri Portal.
-

Skills Applied

- AI Awareness & Advocacy
 - Professional Communication
 - LinkedIn Marketing
 - Community Engagement
 - Digital Campaign Execution
 - Technical Content Promotion
 - Networking
 - Personal Branding
-

Outcome

- Successfully completed the awareness campaign.
 - Promoted the official program using my assigned UTM registration link.
 - Increased visibility of the Snowflake Cortex AI program through LinkedIn.
 - Submitted proof through the Campus Mantri Portal.
 - Task approved by the GeeksforGeeks Campus Mantri Team.
 - Earned **500 Points** for successful completion.
-

Admin Feedback

We truly appreciate your effort and dedication. Keep pushing forward and continue creating awareness through your work. You are one step closer to becoming a true Campus Mantri. Thank you for your outstanding contribution, and we wish you all the best for the upcoming tasks!

Technologies & Platforms

- GeeksforGeeks Campus Mantri Program
 - Snowflake Cortex AI
 - Snowflake AI Data Cloud
 - LinkedIn
 - UTM Registration Link
 - Digital Awareness Campaign

Learning Outcome

This campaign enhanced my understanding of modern AI technologies and strengthened my ability to communicate technical concepts to a broader audience. By promoting the Snowflake Cortex AI program, I gained valuable experience in community outreach, professional networking, and digital advocacy while learning about AI agents, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and enterprise AI applications. The activity also improved my content promotion, campaign execution, and technical communication skills, reinforcing the importance of continuous learning in the rapidly evolving field of Artificial Intelligence.
