Hey Geeks!

The reason you are not seeing any updates on your dashboard is that the task submission deadline has ended. Additionally, your dashboard credentials will be deactivated, as new Campus Mantris will receive fresh credentials for the next phase.

As previously communicated, the final selection is based on two factors:

- Dashboard Performance Points
- Registrations through your Personal UTM Link

Until then, we encourage you to register for this workshop:

<https://gfgcdn.com/tu/vb3/>

You may also share it within your network and try to get as many registrations as possible.

The evaluation process has been completed, and the final updates will be shared via email on or before 25th June.

Please note that there is currently no official Campus Mantri WhatsApp group. If you have joined any group claiming to be official, kindly leave it immediately.

Also, no selection emails have been sent yet, and the results have not been announced. Please do not believe any rumors or unofficial information.

The official results will be released only on 25th June. Kindly keep checking your Inbox and Spam folders.

Thank you for your patience and cooperation.

Team GeeksforGeeks
