Why 80% of AI Agents Hit a Wall And How Browser Infrastructure Help Break Through It

Hey Geek,

You have successfully registered for the Why 80% of AI Agents Hit a Wall And How Browser Infrastructure Help Break Through It.

Workshop Date: **27th June 2026**

Session Time: **2:30 PM IST**

Session Link: [Click Here](#)

What will you learn:

- Learn how to diagnose whether your browser agent failures are model problems, logic problems, or infrastructure problems and stop solving the wrong layer.
- Walk through real agent archetypes booking, HR, flight search and the specific infrastructure failure modes each one hits at scale.
- Understand the four infrastructure decisions that separate teams running reliable agents in production from teams still debugging prototypes.
- Leave with a prioritized action plan to take a working browser agent and make it production-ready at scale.

See you at the session!
